ID KAPPA
BRIDGEPLUGS

- **Set on slickline, wireline or pipe**
- **Reliable sets**
- **Available for 2-3/8” to 20” tubulars**
- **Rapid drillout**
- **Set force retention**
- **Sets in P110 csg.**

The ID KAPPA product line of cast iron bridge-plugs is a cost effective and dependable solution to permanently or temporary well suspension. The cast iron construction allows it to be easily removed with standard drilling procedures.
The plug can be set using either mechanical setting tools or wireline setting tools using the same plug, saving on inventory cost while increasing flexibility on site.

Other applications where the ID KAPPA range have been used are:

- Remedial cementing operations
- Water Shutoff operations
- Used as kick-off point for sidetracks
